Mile High Shade

OVERVIEW:

These lucky homeowners have found themselves living in a picturesque and tranquil location. Surrounded by lush greenery and a sense of community, they are able to escape the hustle and bustle of city life while still being within reach of its amenities. However, their idyllic surroundings come with its own unique challenge - harsh sun exposure.

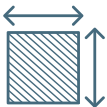

NEED:

The homeowners in Denver faced the challenge of extreme heat, requiring a shading solution that could provide ultimate protection from the harmful UV rays of the sun. In addition to this, they also desired a product that would guarantee maximum privacy and prevent anyone from looking into their home. Keeping these needs in mind, our team at Eclipse Shading recommended a high-quality shading solution that offered both UV protection and privacy features.

SOLUTION:

After careful consideration, the homeowners decided to install the Eclipse Drop Arm on their windows as a solution for their specific needs. This particular unit stood out above other options due to its ability to provide a wide range of motion, reaching up to 170 degrees of inclination. With this feature, the homeowners can now not only control the amount of sunlight that enters their home at any given time, but also have the option to completely block out unwanted light for privacy.
