

## RETRACTABLE AWNINGS

Our European-designed, retractable, lateral arm awnings are custom-crafted and uniquely designed to blend with the look of your individual home or business. They provide up to 98% UV protection, and carry a 10 year warranty on fading. Our awnings are typically ordered motorized, which allows for easy operation.

## EXTERIOR SCREENS

Exterior Screens greatly reduce solar heat gain by limiting the effects of the sun before they enter your home, lowering room temperatures by up to 20 degrees! Eclipse screens also offer privacy and security to any location. Our screens are custom made and come in a variety of hardware options and fabric colors.

## INTERIOR SHADES

Interior mounted shades will not only reduce your cooling costs and manage ambient light, but also reduce the sun's damaging effects on your home's interior. Their retractable nature also allows you to roll them up during the cooler months of the year, allowing maximum warmth and sunlight to enter your home.

## LOUVERED ROOF

Our Eclipse Latitude is a revolutionary outdoor roofing solution that allows you to control the amount of sunlight in your space, and provide protection from the elements.
