

INTERIOR ROLLER SHADES

UNIQUELY DESIGNED

SUN CONTROL ON YOUR OWN TERMS

Enjoy the effective energy control of Eclipse shades while maintaining your beautiful view. Interior mounted shades will not only reduce your cooling costs and manage ambient light, but also reduce the sun's damaging effects on your furniture, carpets and other valuables. Due to your shades being retractable, you can keep your shades rolled up during the cooler months of the year and allow maximum warmth and sunlight to enter your home.

TO MEET YOUR NEEDS

YOUR STYLISH, GREEN SOLUTION PROVIDING ELEGANCE TO ANY SPACE

Eclipse roller shades are self storing and virtually invisible when retracted behind the optional fascia, providing a clear and complete unobstructed view of your surroundings. When shade is desired, you can add color and style to your living space while reducing solar heat gain and blocking out damaging UV rays. The overall simple lines of the product reflect today's styling choice for both residential and commercial applications.

AUTOMATED “SUNGLASSES” FOR YOUR WINDOWS

Motorized Eclipse shades can be activated during periods of heavy sunlight to reduce direct light and glare as well as manage ambient light. You'll be able to enjoy your view without the harsh direct sunlight. Because our shades are fully retractable, you determine when you need them to perform for you. Your motorized shades can be installed to work independently, in concert with other shades or function automatically with sun and room temperature sensors - how cool is that?

THE NEXT GENERATION IN SHADING

ECLIPSE OFFERS A COMPLETE LINE OF ROLLER SHADES

THE 3" ROLLER SHADE

This is our most economical solution to solve your sun problem. The Eclipse 3" roller shade is available with manual beaded pull chain or motorized with either low voltage or rechargeable battery motor. They can be constructed up to 120" wide with a 96" drop. This version is ideal for light commercial or low use residential applications.

THE 4" ROLLER SHADE

This is the "big brother" to the Eclipse 3" roller shade with 25% stronger components. This model is available in motorized or manual format and can be integrated into an existing automated system. The heavy duty shade is designed to provide trouble free solar protection or single openings up to 144" wide and up to 132" drops.

THE 5" ROLLER SHADE

The 5" Eclipse roller shade is our strongest interior system, utilizing a larger & stronger roller tube. This allows us to create shades up to 192" wide with a single panel of fabric. This unit also offers both manual and motorized operation styles.

THE 5" DUO ROLLER SHADE

The 5" duo roller shade provides the best of both worlds by utilizing dual rollers with two different fabrics. The first sheer fabric is designed to filter the sun while the other fabric is opaque, ideal for turning your room from day to night. The Duo shade is perfect for media rooms or wherever privacy is desired at a touch of a button. The Duo shade is custom made in widths up to 120" and drops up to 96".
