

SHADING SOLUTIONS FOR YOUR BUSINESS

UNIQUELY DESIGNED

Eclipse Shading offers a complete line of retractable awnings, shades and screens. These customized, on-demand shading solutions will enhance your customer's experience while adding a level of functional elegance to your business that will get you noticed. Depending on the application, they can also improve the usefulness of your outdoor seating area by protecting your customers from the elements when needed.

RETRACTABLE AWNINGS

Not only do retractable awnings add color and style to your business, they incorporate basic functionality by protecting your customers and merchandise from the sun and light rain. Retractable awnings improve the curb appeal of your business and add an old-world charm and comfort to any outdoor dining experience.

Eclipse awnings are motorized to provide simple touch of a button operation. By adding a sensor, your awning can extend and retract automatically to help reduce your cooling cost or provide instant shade when needed.

RETRACTABLE SCREENS

Eclipse retractable exterior screens extend the use of your outdoor dining space by providing a layer of on-demand protection from the sun's heat and glare. Eclipse screen systems can also provide protection from wind and rain...and bugs, too! Exterior screens add a sense of privacy and security while allowing your patrons to enjoy the experience you've worked hard to create.

Depending on fabric selected, you can also control the temperature of your outdoor space by up to 20 degrees. Eclipse offers several models of exterior screens, all of which are custom made and to your exact specifications. These units are professionally installed for long lasting performance.

TO MEET YOUR **BUSINESS** NEEDS

Our high-quality, customizable awnings are the perfect addition to any commercial building, providing shade and shelter for your customers and clients.

Our retractable screens provide both protection and versatility, allowing natural light to flood in while keeping insects and UV rays out.

EASY TO CONTROL & OPTIONAL SENSORS

Eclipse utilizes UL listed motors and controls from Somfy, the world leader in home automation. You can operate your shading system with a wireless wall switch, a hand-held remote, from your smart device... or from all of these! To increase the usefulness and effectiveness of your shading system, plus add a level of protection, Eclipse also offers sun sensors and motion sensors.

BUILT TO YOUR SPECIFICATIONS

Your independent Eclipse dealer is a shading expert who will design and install products that are both beautiful and functional. We assemble our products right here in the USA using the finest components from around the world. Using state-of-the-art equipment and the latest technology, our skilled craftsmen and assemblers build every unit from scratch typically in 7 to 10 days from the date of order. This express production schedule allows your Eclipse dealer to normally install your awning, screen or shade in about 3 weeks or less.

Your independently owned and operated dealer

99.2% of Eclipse customers would recommend us to a friend or neighbor. (based on 2022 & 2023 Eclipse owners feedback)
